Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Konuta et al.

Konuta et al discloses a moving image data reproducing apparatus that shows all the limitations recited in claim 1, including the feature of the internal memory for temporarily storing moving image signal (See Konuta et al's Figure 1, component 13), the feature of transferring a predetermined amount per time of the moving image signal from the recording medium to the internal memory and reproducing the moving image signal stored in the internal memory as specified in the present claim 1. (See Konuta et al's page 1, paragraphs [0019-0021], and page 3, paragraph [0037]).

3. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujita discloses a device for high speed processing of information frames.

Kajimoto discloses a video reproducing apparatus.
